Artistry™ Intensive Skincare Advanced Vitamin C + HA Treatment

0.40 fl. oz./12 mL
Item #: 120524

Your advanced daily treatment for a refreshed, plumped, youthful look

Add wrinkle-targeting power, antioxidant protection and elasticity renewal to your daily skincare regimen with Artistry™ Intensive Skincare Advanced Vitamin C + HA Treatment. Inspired by dermatologist-administered, injectable fillers*, it's clinically proven to visibly and dramatically reduce the appearance of major expression lines, including crow's feet, forehead creases, worry and brow lines, frown lines, 11 wrinkle lines, and smile lines. Plus it helps maintain your skin's natural plumpness, creates a healthier, younger look all over and, with continued use, helps prevent the future appearance of lines caused by environmental aggressors – something no injectable filler can do.*

*Results not equivalent to surgical/cosmetic procedures.

Summary

Description

This super-powerful treatment reduces the appearance of expression lines, adds antioxidant protection and, with continued use, helps prevent the future appearance of lines caused by environmental aggressors. It contains a 100% pure Vitamin C blend to help strengthen the skin’s support network, helping keep it flexible and resistant to wrinkles. Dual-action Hyaluronic Acid Blend with green Acerola Cherry Extract, or “HA” hydration boost, gives skin a younger, smoother, more plumped appearance. It delivers immediate plumping in the upper levels of the skin and it also penetrates deep in the skin’s surface, keeping it hydrated and flexible.

Benefits

- Innovative activating cap delivers the highest concentration of 100% pure Vitamin C ever offered in an Artistry™ formula.
- Vitamin C is one of the strongest and best antioxidants ever discovered. Antioxidants fight against free radicals – the result of pollution, environmental impacts and stress.
- Immediately smooths and diminishes the appearance of expression lines.
- Within one week expression lines are visibly plumped.
- After 4 weeks wrinkles and expression lines are visibly reduced.

Frequently Asked Questions

Who can use Artistry™ Advanced Vitamin C + HA Treatment?
Artistry™ Advanced Vitamin C + HA Treatment is formulated to be used by all skin types, all ages (18+) and all ethnicities.

Is Artistry™ Advanced Vitamin C + HA Treatment appropriate for sensitive skin?
Artistry™ Advanced Vitamin C + HA Treatment has been thoroughly tested on groups of individuals with sensitive skin. In this testing, there was no evidence of allergic response or extreme irritation. However, we recognize that no testing program can guarantee that all individuals who wish to use this product will not react.

Are any ingredients or technologies in Artistry™ Advanced Vitamin C + HA Treatment exclusive to the Artistry™ brand?
Yes, we feature exclusive Nutrilite-approved Acerola Cherry Extract. This Acerola Cherry Extract is exclusive to Artistry™ skincare, and has a very high antioxidant value because it is a rich, natural source of the antioxidant vitamin C.

How is Artistry™ Advanced Vitamin C + HA Treatment different from Vitamin C + Wild Yam Treatment?
Artistry™ Advanced Vitamin C + HA Treatment has the highest amount of vitamin C ever offered in an Artistry™ skincare product – 20% more by volume than the previous formula. It provides a remarkable 35% more antioxidant protection than the previous formula and contains 100% pure vitamin C in its innovative activating cap – a first for Artistry™ skincare. Contains our Bi-Action Hyaluronic Acid Blend to restore a plumped, fuller, youthful look.

What is the shelf life of Artistry™ Advanced Vitamin C + HA Treatment, and how long can I use it after it’s been opened?
The shelf life of the unopened product is three years. Once the product is activated by pressing the button and mixing the 100% pure vitamin C powder with the serum, we recommend that the product be used within 30 days to ensure full product efficacy. NOTE: As the activated Treatment nears the 30-day point, customers may see a yellow tint develop in the formula. This is a helpful visual indication that the product is nearing the end of its peak potency.

Can I use my current Artistry™ regimen with Artistry™ Advanced Vitamin C + HA Treatment?
Yes! Artistry™ Advanced Vitamin C + HA Treatment was designed to be added to your existing Artistry™ regimen. Use it before your daily concentrate.

More Information

Use Instructions:

To activate

Before using the product, you must activate it as follows:

Remove the dropper from the serum-filled bottle and replace with the innovative activating cap. For your convenience, the carton has been designed to hold the dropper during the next few steps. Firmly press the button on top of the cap to release the 100% pure vitamin C into the serum.
Shake for 30 seconds, until the powder completely dissolves. Replace the activating cap with the dropper.

If you see bubbles after shaking, don't worry. They will not affect the Treatment and will go away in about an hour. To avoid seeing bubbles, activate it the night before the first use. If the Treatment feels grainy or gritty on skin after activation, the powder has not fully dissolved. Shake vigorously for another 30 seconds.

**To apply after initial activation**

Every morning and evening after cleansing and toning your skin, place 4 or 5 drops of the activated Treatment onto the palm, then apply to face with fingertips. Apply all over, concentrating on visible expression lines while avoiding direct contact with eyes. Follow with a daily serum and moisturizer.

As the activated Advanced Vitamin C + HA Treatment nears the 30-day point, you may see a yellow tint develop in the formula. This is a helpful visual indication that the product is nearing the end of its peak potency – and that it's time to order a new bottle. While the product remains safe to use, after 30 days we recommend activating a new bottle.
